

Review: Boolean Algebra (popquiz)

A last ditch effort to gain a few more points for midterm grades.

1. What are the three components required to define an **algebra**?
2. What is the **set** used in Boolean algebra and what do its elements represent?
3. What are the three basic **operations** in Boolean algebra?
4. What is the result of the Boolean expression: **NOT 0** ?
5. What does the rule of **commutativity** mean for the AND operation?
6. What is the result of the Boolean expression: **0 AND 1** ?
7. What is the result of the Boolean expression: **0 OR 1** ?
8. What is the result of applying the NOT operation twice: **NOT (NOT p)** ?
9. What is the value of the Boolean expression: **1 AND 1** ?
10. Why is Boolean algebra important in **computing**?
